*Churches & local businesses - please submit your order before April 1st*

### Keeping Easter Plants Indoors:

- Do not place near a draft where they will be exposed to heat or dry air from appliances, fireplaces or heat ducts.
- Place in bright, indirect daylight
- **Do not to let your plant sit in trapped, standing water.** Be sure to remove the plant from the cover sleeve water it thoroughly until the soil is completely saturated.
- Once your lilies, daffodils, tulips and hyacinths have finished blooming, place the pot in a *sunny* location in the home until all danger of frost has passed at which time you can move the pot to a sunny location outdoors. Plant once foliage has died back.
